FROM PADDLE TO GAS TURBINE - THE EVOLUTION OF MARINE PROPULSION

Denis Sexton
GCGI CEng MIMechE

This talk will follow the evolution of marine propulsion from paddle steam as used in the SS Great Western through to the modern gas turbine.

Along the way we'll also consider the SS Great Britain screw propulsion system, triple expansion, and the first marine steam turbine of Turbinia.

Tuesday 19th November 2019
6:30pm refreshments; **7pm start**
North Leamington School
Sandy Lane, Blackdown
Leamington Spa, **CV32 6RD**

Free, open to all, no need to book
